The specimen Sales Contract states that the developer intends to sell the residential units therein to third persons causing the fee owner to issue to each purchaser of a condominium unit a lease of such condominium unit and of an undivided interest in the common elements of the project.

1. Building Description. The project will consist of one building with six levels, excluding the basement, a swimming pool with deck, and multiple planting areas. It will contain 50 apartments, a resident manager's apartment, and parking areas in the basement and ground floor. The building shall consist of two wings, connected together in the shape of a "T" with the west wing at the top of the "T" extended from south to north and the east wing extended from west to east, approximately parallel with the beach. The building will be surrounded on the south side by the swimming pool, continuous planting areas and the beach, on the north side by the ground floor parking area and Kihei Road, on the east side by continuous planting areas and on the west side by continuous planting areas, which at the commencement of the project shall extend over onto the adjacent land, in accordance with a Tenancy at Will Agreement by which the said adjacent land will be rented as additional land for the project with the landscaping costs, the rental cost and all other costs and expenses pertaining to the said adjacent land being a part of the common expenses of the project incurred by the Association of Apartment Owners.

The building shall have six levels, plus a basement. The first level has been designated as the ground floor. Thereafter the levels have been given designations as floors 2 through 6 in ascending order. Access to the upper floors is by elevator and by three stairways. The elevator is located at the junction of the two wings. Stairway No. 1 is located immediately

to the south of the elevator. Stairway No. 2 is located at the eastern end of the east wing. Stairway No. 3 is located at the northern or Kihei Road end of the west wing.

The basement is essentially a parking level with 26 parking stalls, designated 1 through 26. There is also a trash room and an elevator lobby in the basement. The area immediately adjacent to the elevator lobby is a "no parking" area providing access to the trash containers and the elevator. The ground floor has one 2-bedroom apartment and five 1-bedroom apartments, an elevator lobby, a walkway on each of the two wings, providing access to the apartments, the elevator, the three stairways, a fourth stairway leading down from the parking area to a concrete walkway which provides access from Kihei Road (said walkway being on a level above the basement but below the ground floor), the swimming pool, and the parking area with 25 parking stalls, designated 27 through 51 and a guest parking stall designated 52. The second through sixth floor inclusive each have one 2-bedroom apartment, seven 1-bedroom apartments and one studio apartment, a walkway on each of the two wings, providing access to the apartments, the elevator, an electric room, and the three stairways. There are wooden trellises on the second floor covering portions of the ground floor parking area. There is an elevator machine room on the roof.

2. Materials. Each building shall be constructed principally of reinforced concrete floor slabs, concrete block-bearing walls, prestressed concrete roof slabs, concrete masonry, concrete tile roof, wood trim, wall-board, steel, glass and allied building materials.
3. Description, Area, Numbering and Percentage Interest of Apartments. Each apartment shall include all the walls and partitions within its perimeter walls; all glass windows or panels along the perimeters; the entirety of perimeter non-party walls except for the exterior decorated surfaces; the interior half of perimeter party walls; the inner decorated or finished surfaces of the floors and ceilings; the adjacent lanai to the exterior edge of the concrete floor slabs; the built-in fixtures including the range, refrigerator, garbage disposal, dishwasher, stacked washer/dryer,

air conditioning unit, water heater, sinks, bathroom fixtures, carpets and drapes; and all air space encompassed within the apartment; provided, however, that the portion of each party wall and of each load bearing wall (whether or not a party wall) which is included in any apartment is a common element (except for the inner decorated surface of said wall within said apartment, which is not a common element) and that the exterior decorated surface of each perimeter non-party wall is a common element; and provided further that any ventilation duct shafts within an apartment as shown on said condominium map is a common element.

Each apartment, has been given a three digit numerical designation by which its location in the building can be determined. The first numeral of the designation corresponds with the floor number, with the ground floor being floor number 1. The ending two digits of the designation indicate the location of the apartment on a floor. The easternmost apartment on each level, which is the apartment at the east end of the east wing, is given a designation ending in 01. The designation numerically increases for each subsequent apartment on the east wing, in ascending order westward, until the apartment designation ending with the numerals 03. The southernmost apartment on each level, which is the apartment at the southern end of the west wing, is given a designation ending in 04. The designation then numerically increases for each subsequent apartment on the west wing, in ascending order northward towards Kihei Road, until the apartment designation ending with the numerals 06 for the ground floor and 09 for the second through sixth floors inclusive.

Each apartment has also been given a designation indicating what type of apartment it is. There are four types of apartments, Types "A", "B", "C", and "D":

The Board of Directors of the Association of Apartment Owners may employ necessary personnel to carry out management and operation functions of the project. The By-Laws submitted to the Commission permit the developer to appoint the initial managing agent.
